

**Healthier workplace.
Happier employees.
Fewer missed work days.**
WITH ONE SIMPLE SCREENING

JULY 2022

A quick, painless screening ultrasound that looks at the carotid arteries, abdomen, liver, kidneys and aorta can help members understand their risk for chronic disease **before** symptoms arise. And early detection allows them to get the care they need to stay healthy and continue working efficiently.

Through a health plan, the cost of these exams might average over \$1300 each, digging deep into wages already affected by inflation. **With Green Imaging, your members can receive a comprehensive screening for a small fraction of this price.**

Your employer doesn't offer Green Imaging?

This is a good time to ask them to add us to your health plan. We are a simple, bolt-on solution--and most employers save enough on all diagnostic imaging to offer us at **\$0 out-of-pocket cost** to employees.

We are also a cost-effective alternative for self-pay patients opting not to use their company-sponsored high-deductible health plan.

A simple, screening ultrasound can help detect:

- narrowing, calcification or wall thickening of the carotid artery, which can indicate an increased risk of cardiovascular disease
- fatty liver
- kidney stones/gallstones
fatty deposition in the kidneys which is a precursor to diabetic renal disease
- cysts, masses, tumors or other unusual growths
- abdominal aortic aneurysms or atherosclerotic disease

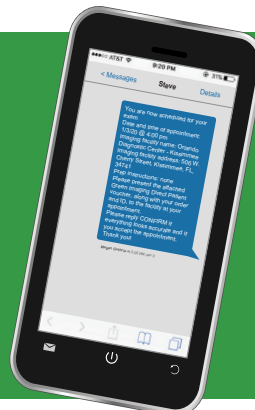

And facilitate early intervention to keep your employees happy, health and productive.

BOOKING YOUR APPOINTMENT COULDN'T BE EASIER

TEXT: 713.524.9190
EMAIL: info@greenimaging.net
CALL: 844.968.4647

Include a picture of your physician order, your zip code and your availability

We'll take it from there!

The pandemic put our health on pause.
It's time to take back control.
